If registering with eventbrite please be sure to fill out and submit a signed registration form.

God's week of Lighting things Up and Getting things Charged

This year we focus on **Light, Electricity & Magnetism and Space** while we explore Day 1 (light) and Day 4 (space) of God's Creation week

How does electricity work?
Why does your compass always point north?
Can you always see light?
Why is the earth 150 million km from sun?

Explore the answers as you join in:

- ◆ **Hands-on Science Experiments**
- ◆ **Games, Songs & group activities**
- ◆ **Crafts & Cool projects & Prizes**
- ◆ **Exciting account of our origins**

You will:

Create **Rainbows**
Make **an electric project**
Bend **light**
Create **a battery**
& **many other fun activities!**

Camp Activities:

- ◆ **Hands-on Science** everyday
- ◆ **Games, Songs & group Activities**
- ◆ **Crafts, cool Projects & Prizes**
- ◆ **Exciting discovery** of the creation account of our origin

The **Camp Mission** is to educate children about the creation foundation of the Christian faith, in order to bring them to a place of confidence in the Biblical account of origins. We do this through holding child-centered, "hands-on" science day camps.

This is a church community effort with members of different Kamloops churches working together.

What campers are saying:

I wish it was two weeks!

I loved the projects!

What parents are saying:

My child loves science so he looks forward to this camp each year. Learning about the creation account and how it applies to today has increased his confidence in the Bible.

My daughter loves nature and loves to know how things work, so I think it is fantastic that they have this camp.
